Subject: PRTAF F-16 FLEET WIRING RELATED PROGRAMS

1. The Portuguese Air Force (PRTAF) and InterConnect Wiring, now supported by NCC Aero, have been very successfully working together for over 15 years, namely in a numerous F-16 aircraft rewiring, panel refurbishment and wiring upgrade programs, in support of the PRTAF F-16 aircraft fleet.
2. InterConnect Wiring as a Lockheed Martin licensee for F-16 wiring harness and electrical panel has proven itself throughout these years as a highly reliable wiring goods and services provider, extremely focused on improving manufacturing and administrative processes using state of the art management practices as Lean Manufacturing and Six Sigma initiatives.
3. Being an industry leader with a profound culture of continuous improvement, has achieved a remarkable performance, both on delivery as in product quality, which is reflected in the excellent support to our F-16 aircraft fleet.
4. The Portuguese Air Force would like to express its deep appreciation for InterConnect Wiring responsiveness and outstanding professionalism, provided in support of the PRTAF F-16 aircraft wiring related program requirements and would highly recommend your company to other F-16 users looking to develop similar programs.

Sincerely,

The F-16 Program Director

Pedro Alexandre E. Salvada
Major-General
