

Capabilities Statement

Company Overview

InterConnect Wiring, founded in 1993, is the leading manufacturer of electrical wiring harnesses and avionics panels for Aerospace and Defense (A&D) such as the F-15, F-16, F-22, C-130 and vertical lift aircraft. InterConnect also manufactures sheet metal parts for aviation application. With decades of experience, we support aircraft modernization, sustainment, and production for an aircraft's Electrical Wiring Interconnection System (EWIS). Refer to our website for details on our products, our quality certifications, licenses, photos and even many videos at www.interconnect-wiring.com.

Core Capabilities

1. Wiring Harness Manufacturing: Build-To-Print (BTP) wiring harnesses for A&D applications.
2. Fiberoptic Cable Assembly: BTP assemblies for military including the C-130, F-16 and others.
3. Electrical Panel Manufacturing: Production of various panels which support avionics and mission-critical functions such as cockpit panels, circuit breaker panels, mux assemblies, relay assemblies, black boxes, and power panels.
4. Sheet Metal Fabrication: Precision manufacturing of sheet metal parts using in-house, new, state of the art equipment including CNC Routers, 22-Ton Punch, Brake Press, Spot Welders, 4-Axis Mill, and Paint Booth.
5. Group A Kits: Assembly of electrical kits required for aircraft sustainment and upgrade programs such as the AH/UH-1, UH-60, F-16, C-130 and other platforms.

Differentiators

1. Over 30 Years of Experience in military and aerospace wiring harness manufacturing.
2. AS9100 & ISO 9001 Certified: Industry-leading quality control and compliance.
3. Trusted Supplier to the U.S. Military and Major Defense Contractors.
4. Proven Global Partnerships in Aircraft Modernization & Sustainment Programs.

Key Customers & Partners

1. U.S. Air Force, Navy, Marines, Army, Coast Guard & the Department of Defense
2. Lockheed Martin, Boeing, Northrop Grumman, L3Harris, Bell and Sikorsky
3. Global Military Operators
4. Aircraft Maintenance Depots
